Isabela / Sierra Negra	<i>C. guntheri</i>	Critically Endangered
Santa Cruz – East	<i>C. donfaustoi</i> *	Critically Endangered
Santa Cruz - West	<i>C. porteri</i> *	Critically Endangered
Santiago	<i>C. darwini</i> *	Critically Endangered
Isabela / Cerro Azul	<i>C. vicina</i>	Endangered
Isabela / Darwin	<i>C. microphyes</i>	Endangered
San Cristóbal	<i>C. chathamensis</i> *	Endangered
Isabela / Alcedo	<i>C. vandenburghi</i>	Vulnerable
Isabela / Wolf	<i>C. becki</i> *	Vulnerable
Pinzón	<i>C. duncanensis</i> *	Vulnerable
Floreana	<i>C. niger</i> *	Extinct
Pinta	<i>C. abingdonii</i> *	Extinct

*Assessment posted on the Red List. The remaining four have been submitted and should be posted during 2018.

**Population on Fernandina Island is likely extinct; however, it requires one final extensive search for tortoises before making this definitive.
